The International Network of Educational History Collections (INEHC) is preparing a COST Action proposal to strengthen international collaboration among researchers and professionals working with collections relating to the history of education in libraries, museums and archives.

We would welcome expressions of interest from researchers and collection professionals who would like to join INEHC and help develop the COST Action proposal. We are particularly keen to hear from colleagues who:

- are affiliated with an institution in a COST Inclusiveness Target Country (ITC)
- are under the age of 40
- are currently researching, curating or managing collections related to the history of education.

COST Inclusiveness Target Countries are Albania, Armenia, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czechia, Estonia, Georgia, Greece, Hungary, Latvia, Lithuania, Malta, Moldova, Montenegro, North Macedonia, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Türkiye and Ukraine.

Relevant materials include textbooks, wallcharts, photographs, audiovisual media, educational archives, school objects and teacher-preparation materials. We particularly welcome work concerning colonial education, marginalised communities and the transnational circulation of educational knowledge.

The proposed network will support comparative research, improve the discovery and accessibility of collections and promote digitisation and public engagement. COST funds networking and capacity-building activities, such as workshops, conferences, training schools and short-term research visits, rather than primary research.

To express an interest, please contact s.kollmann@dipf.de, providing your institution, country of institutional affiliation, a brief description of your work with relevant collections and confirmation that you qualify as a COST Young Researcher and Innovator.

Further information about INEHC: https://inehc.org/

Please circulate this invitation to colleagues who meet these criteria.
